Subject: The Dtection system at our building

Good Afternoon All,

I want to take a moment of your time to recommend the Dtection system. I wanted to share with you what makes my life a lot easier (besides Rob, the super star).

During the day I can concentrate on the day to day matters, and I can rest at night knowing that I have this added level of protection in our building. I know that leaks are going to happen at sometime, the sooner I can be notified the better. I have seen this system in action.

We have a on-going problem with the plumbing in our building, this system has enabled both Rob and myself to respond before the homeowner was even aware there was a problem. I know with Dtection, I have a win/win with having this system for the HOA, management and the owner. It includes a web based information portal that I can monitor and view the status of each dsensor in all the units.

Matt and his Dtection staff are exceptional in their service to us. I know that a couple of our other buildings have the same system and I have yet to hear of any problems. Dtection has my highest recommendation and praise. If you need their contact information, let me know.
